

Motive Retail powers the real-time data integrations driving the future of automotive

Fast, Simple, Connected.

▶▶ **Faster, Streamlined Integration Testing**

In Q4 2020 Motive Retail released a new version of its proven integration certification suite, **Motive Integrator Certify**. **PBS Systems Inc.**, a provider of Dealership software and services, has been a **Motive Integrator** user since 2015 and has certified over 30 projects across 7 different OEMs.

Better Tools. Clearer visibility. Dynamic integrations.

Motive Retail's newly released product "Certify" on the Motive Integrator Suite accelerates integrations and helps product management and development teams work more efficiently and independently. With enhanced program management tooling and automated testing, DMS providers can bring higher quality, more complex OEM integrations across the finish line faster.

▶▶ **Challenges**

Integrations with OEM systems take coordination across multiple teams: product, project management, development, testing, QA, etc. Being able to intuitively find all of the technical and business process info in the specification and knowing how the team is progressing in their respective areas is critical for a seamless integration process.

▶▶ **Solution**

"It's actually fun now to submit test cases," says Tracy St. Amand, team lead at PBS, "Our developers love automated tool systems. It's not like handing in an essay to a teacher - we get instant verification that what we're doing is right."

▶▶ Results

● 24/7 Automatic Testing

Automatic testing is neatly organized in one place. Developers can select the relevant integration from a drop down of subscribed projects, perform relevant tests, see results, and re-do them if needed. Test status is color and icon coded, all in the same list.

● Project Insights

Intuitive dashboards take the guesswork out of the process. Users and managers know exactly where they are and what needs to be done to complete the project.

● Improved Performance

Motive Integrator's upgraded engines deliver page loads and test evaluations faster. Built-in OS redundancies make the Suite more reliable, secure, and lead to 99%+ uptime.

● Easy Navigation

With more than 30 projects across 7 OEMs, PBS has a LOT of content on Motive Integrator. Finding what you need has been made simple by a clean, new navigation menu.

● World Class Support

Having the ability to submit questions within the Suite and get quick, accurate responses streamlines developer work and accelerates completion of projects.

Developers have 24/7 access to testing, and can submit unlimited “practice” unit, or full use case tests. Managers can log in to the Testing Toolkit and easily see what tests have been performed, what’s failing, what’s passing, and what’s left to complete the certification process.

“Certify cuts down on work time between coding and testing and has increased our velocity by enabling our team to work more efficiently.”

Jennie Campbell

Director of Product and Solutions
